

CUTABLE FLEXABLE TAILGATE SMD LIGHT

S-ST-60-WR

60 INCH STRIP, BREAK, REVERSE

S-ST-60-RR

60 INCH STRIP TURN, BREAK

S-ST-60-RWR

60 INCH STRIP TURN, BREAK, REVERSE

Installation Instructions

SMD Tailgate can be used in many ways, and functions.

This instruction is for flexible cuttable SMD light. The strip comes 60 inch long and will fit big SUV, or small SUV's

Fitment:

SMD strip are cuttable flexible which means can curve, if too long or needed a turn signal installer must cut strip from center and adjust length from center out.

cuttable strip will require tapping of wire from both sides.

wire connection:

The Red wires - can be used as:

- Running lights - which will turn on when the vehicle lights are turned on.
- Break lights- Which will turn on when driver hit the break or
- Turn signal - installing a turn signal will require the installer to cut the smd strip in the center and tap each side of the wire to the tail lights.
- White wire- is a white led uses for reverses light

For professional installation (store methods)

or warm cities, we strongly recommend to use a clear silicon between the 3m in all of the exterior or interior. (At high temperature the adhesive becomes weak).
